Creating the Next Graduate

Georgia Tech offers more than 37 undergraduate majors and 62 minors in virtually every science- and engineering-related discipline, as well as in business, public policy, architecture, and pre-professional areas. Although Georgia Tech students enroll in a particular college and focus on a specific field, their coursework, research and projects will take them across disciplines. This approach gives our students the breadth of knowledge and scope of vision they need to begin solving the complex, interdisciplinary challenges of today and tomorrow.
OUR UNITS

OUE’s units provide exemplary academic support programs and services that enrich the learning experience of undergraduates within an engaging and welcoming environment. These units include:

- **Center for Academic Enrichment (CAE)**
  CAE fosters growth by giving students the opportunity to engage with one another and faculty in research and innovation programs, academic seminars, campus-wide engagement programs, living learning communities, and other endeavors in which they can share ideas, explore possibilities, and take initiative.
  [cae.gatech.edu](http://cae.gatech.edu)

- **Center for Academic Success (CAS)**
  CAS supports undergraduate students in their efforts to achieve their academic goals, develop into self-regulated learners, and thrive within Georgia Tech’s rigorous and academically challenging environment.
  [cas.gatech.edu](http://cas.gatech.edu)

- **Center for Career Discovery & Development (C2D2)**
  C2D2 helps students from all majors not only get work but learn how work works. They partner across campus and around the globe in “career communities” of students, employers, faculty, alumni, and parents to support students’ career discovery and development.

- **Honors Program (HP)**
  HP fosters curiosity, creativity, and connection—for Honors Program participants, Georgia Tech, and communities beyond. HP students are encouraged to pursue their curiosity, creativity, and connection across disciplinary boundaries and the boundary between theory and practice.
  [hp.gatech.edu](http://hp.gatech.edu)

- **Summer Session Initiatives (SSI)**
  SSI promotes and nurtures curricular and co-curricular activities that benefit first-year, continuing and transfer students at Georgia Tech.
  [summer.gatech.edu](http://summer.gatech.edu)

- **Undergraduate Academic Advising (UAA)**
  UUA provides respectful, responsive, informed support for students to identify and achieve their academic and professional goals. Advisors will clearly communicate and collaborate with students to navigate institutional structures and connect with resources on campus.

About the Office of Undergraduate Education

A unit of the Provost’s Office and led by the Vice Provost for Undergraduate Education, the Office of Undergraduate Education (OUE) works to develop an intellectual community at Tech and to foster faculty/student interaction on campus.

OUE does this by creating new curricular and co-curricular activities, advocating for undergraduate students and their academic concerns, managing Institute policies affecting undergraduate students, ensuring student success through advising, tutoring, and support, helping students utilize resources for exploring and pursuing meaningful careers after graduation, and enhancing and coordinating intellectual development, experiential learning, and faculty/student interactions.
