About OUE

Our Mission
The Office of Undergraduate Education (OUE) is a unit of the Provost's Office and is led by the Vice Provost for Undergraduate Education. OUE works to develop an intellectual community at Tech and to foster faculty/student interaction on campus. OUE challenges students to become accomplished learners who are able to make meaningful connections among work, study, and community. We connect curricular and co-curricular offerings to assist students in developing a strong foundation for success, during college and after.

Programs & Services
OUE’s departments were created with you, the student in mind, to provide that can enhance your time at Georgia Tech. Whether you need help with a challenging course, want to identify research opportunities, or find a co-op or internship position, OUE can help. Learn more at oue.gatech.edu.
